Irrational Thoughts and Self-Concept in a Sample of Adolescent Boys and Girls.

Ashraf Mohamed Ali Shalaby, Ph.D.

Lecturer of Developmental Psychology

Faculty of Arts - University of Beni Suf - Egypt
College of Education - King Abdul Aziz University - Saudi Arabia

The aim of this study is to compare between male and female in Self-concept, dimensions and irrational thoughts, and if Self-Concept can be predicted is a result of irrational thoughts.

Methods & Procedures: Method was used Descriptive and Causal Comparative A sample consists of 96 students from secondary school both females and males (46 Females with mean age 15,89 .S.D=0.38 and 50 males with mean age 15,94. S.D=,47),. Two scales were used; The Irrational thoughts for Children and Adolescent Scale developed by Hooper & Layer and The Self-Concept Scale. **Results:** Revealed significant correlation between irrational thoughts, Self-Concept and dimensions in both males and females. The study also showed differences between male and female in Self-Concept dimensions and irrational thoughts. The results also showed that it can be irrational for the ideas represented in the following emotional recklessness to be predictors of self-concept in The total sample.
